

Cable tray standard model representation diagram

Article Overview

Cable trays come in various types such as ladder, solid-bottom, trough, and channel, each with detailed specifications and installation diagrams for industrial and commercial applications.

Types of Cable Trays

- Ladder Tray: Features side rails connected by rungs, ideal for heavy cables and long runs. Provides excellent ventilation and easy cable access. Commonly made from 16-gauge steel tubing and available in gray or black finishes for data centers and industrial use (Hubbell) .
- Solid-Bottom Tray: Offers full support for cables, protecting them from dust and debris. Suitable for sensitive or low-voltage cables (Eaton) .
- Trough Tray: Combines features of ladder and solid-bottom trays, with partial openings for ventilation while providing support (Eaton) .
- Channel Tray: Narrow, enclosed trays for small cable runs or specific routing needs (Eaton) .

Materials and Standards

- Steel: Hot-rolled, cold-rolled, or high-strength low-alloy steel (ASTM A1011, A1008) .
- Zinc Coatings: Hot-dip galvanized or electrodeposited zinc for corrosion resistance (ASTM A123, B633) .
- Compliance: ANSI/NFPA 70, NEMA VE 1, UL, and CE marking for safety and quality
