

# High-precision optical power meter calibration in Belgium

## Article Overview

Accredited optical power meter calibration in Belgium is available through ISO/IEC 17025-certified laboratories such as LHM Instrumentation and DIAMOND SA, offering traceable, high-precision services.

### Accredited Calibration Laboratories

LHM Instrumentation, based in Geel, Belgium, provides ISO/IEC 17025-accredited calibration for a wide range of instruments, including optical power meters. They offer both in-lab and on-site calibration services, ensuring fast turnaround (typically 10–15 working days) and full traceability to national standards. Their services include responsivity calibration, linearity testing, and verification of optical detectors under controlled environmental conditions (23°C, 50% relative humidity) to maintain measurement accuracy. LHM also manages asset tracking and offers transport services across Belgium. DIAMOND SA operates an ISO/IEC 17025:2017-accredited fiber optic calibration laboratory, providing high-precision calibration for optical power meters, light sources, and OTDRs. Their services include absolute power and linearity calibration, wavelength spectrum measurements, and environmental testing such as vibration, temperature cycling, and humidity resistance. DIAMOND guarantees fast turnaround (2–3 days) and delivers official calibration certificates with measurement uncertainties fully traceable to national standards.
