

How to configure the optical port of the switch

Article Overview

To configure an optical port, ensure the correct SFP transceiver is installed, verify compatibility, set the interface speed and duplex, and apply the configuration in the switch CLI or management interface.

Step 1: Select and Install the Correct Transceiver

- Choose an SFP/SFP+ module compatible with your switch model and the desired link speed (1G, 10G, etc.), .
- Verify the connector type (commonly LC) and polish type (UPC or APC) to match the fiber cable .
- Insert the transceiver into the optical port, ensuring it clicks securely.

Step 2: Connect the Fiber Cable

- Connect the fiber cable to the transceiver, matching outbound to inbound on the opposite end .
- Use single-mode or multi-mode fiber depending on distance and transceiver type. Multi-mode is suitable for short runs, single-mode for longer distances .
- Avoid sharp bends and protect the cable with conduit if running outdoors .

Step 3: Verify Hardware Recognition

- Check that the switch recognizes the transceiver and interface. Commands vary b...
