

How to connect the optical port router module

Article Overview

To connect an optical port module to a router, insert the SFP/SFP+ module into the router's compatible port, then attach the fiber optic cable carefully, ensuring proper alignment and secure seating.

Step 1: Verify Compatibility and Prepare

Before installation, check that your router supports the SFP or SFP+ module you plan to use, including the correct speed and fiber type (single-mode or multi-mode) (). Ensure the module and router are free from dust or debris, and take ESD precautions to prevent static damage ().

Step 2: Insert the Optical Module

- Remove any protective covers from the SFP port on the router.
- Hold the SFP module with the alignment key facing the port.
- Slide the module straight into the port without twisting or forcing it. You should feel or hear a click when it is fully seated ().
- If the module has a latch or screw mechanism, engage it gently to secure the module ().

Step 3: Connect the Fiber Optic Cable

- Remove dust caps from both the fiber connector and the module's optical bore.
- Clean the fiber connector end-face using a lint-free wipe and isopropyl alcohol to prevent signal loss ()....
