

Installation Quotation for Fiberglass Cable Trays

Article Overview

Fiberglass cable tray installation costs typically range from \$10 to \$50 per meter, depending on specifications, design, and installation complexity.

Cost Factors

The price of fiberglass (FRP/GRP) cable trays depends on several key factors:

- **Material and Resin Type:** Fiberglass trays are available in polyester or vinylester resin systems, with vinylester offering higher chemical resistance. Both types are corrosion-resistant, non-conductive, and non-magnetic, which reduces long-term maintenance costs and safety hazards .
- **Tray Design:** Ladder, solid bottom, or ventilated designs affect cost. Solid bottom trays provide extra protection for cables but are generally more expensive .
- **Size and Dimensions:** Wider and deeper trays accommodate more cables but increase material and installation costs .
- **Installation Complexity:** Supports, brackets, connectors, and the layout of the facility influence labor costs . Fiberglass trays are lightweight—about one-third the weight of steel trays—making them easier and safer to install while maintaining high strength-to-weight ratios .

Benefits of Fiberglass Cable Trays

- **Durability:** Resistant to corrosion, UV exposure, and harsh chemicals, ideal for ind...
