

Is a fiber optic cable splicing certificate still required

Overview

The CFOT is the basic certification required for all installation personnel. Skills-based certifications require a CFOT or CPCT as a prerequisite for both classes at a FOA-Approved. This 2-day fiber optics CFOS/S - Certified Fiber Optic Specialist, Splicing - is the FOA certification for technicians splicing primarily outside plant (OSP) fiber optic cable plants for concatenation and termination. The skills focus includes cable preparation of numerous cables, fusion splicing. A new FOA microcredential for anyone working in fiber optics, not just technicians. About The Fiber Optic Workforce. Some students may benefit from completing the IN101: Installer 1 training course prior to attending; however, this is not a requirement. A technician who needs to terminate connectors might end up sitting through a design-heavy certification course, while an engineer responsible for network architecture could be enrolled in hands-on splicing classes they.
