

Metal Optical Cable Distribution Box Company

Article Overview

Bwnfiber, Huijue Group, and Sinda Optic are leading manufacturers of metal optical cable distribution boxes for indoor and outdoor fiber optic networks.

Key Manufacturers

Bwnfiber specializes in metal fiber optic distribution boxes made from stainless steel or cold-rolled steel with electrostatic plastic-spray surfaces, offering excellent waterproof and dustproof performance. Their products are suitable for FTTH, FTTB, and FTTx applications, supporting single, ribbon, and bundle fiber cables. Bwnfiber provides OEM services, custom colors, and design drawings, with fast sample delivery (1-3 days) and general order lead times of 5-15 days. Their boxes are designed for cable termination, splicing, distribution, and cross-connection, making them ideal for both indoor and outdoor installations. Huijue Group manufactures 12-core metal fiber distribution boxes (e.g., HJ-GF-KJW-12A) with welding and separation structures for fiber splicing and wiring. These boxes are suitable for FTTH home projects, residential corridors, and metropolitan broadband networks. They support multiple installation methods, including overhead, pole, and wall mounting, and are designed for both urban and remote applications. Sinda Optic offers metal terminal boxes for fiber optic wall-mount termination, DIN rail distribution, and FTTH customer terminals. Their products accommodate various adapters (SC, LC, FC, ST) and pigtails, providing flexible solutions for mini-network terminals and residential buildings. Sinda Optic emphasizes high-quality cable management and custom solutions for optical fiber systems
