

Mexico Fiber Optic Communication Network Planning

Overview

The plan gives policy backing to a broader connectivity agenda that combines spectrum planning, public fiber deployment, mobile expansion and social coverage programs to extend internet access across the country, particularly in underserved and priority areas. Mexico is deepening its state-led telecom strategy under the National Connectivity Plan 2026–2030. In April 20, 2026 its National Connectivity Plan 2026–2030 (PNC), a binding six-year policy framework that fundamentally reshapes the telecommunications landscape. The Plan—published today by the Agency for Digital Transformation and Telecommunications (ATDT)—is the first comprehensive connectivity. CFE reported significant progress in expanding internet access and telecommunications coverage across Mexico, positioning digital connectivity as a central pillar of the federal government's social and development agenda. According to a press release issued on Dec. 24, 2025, the state-owned. This network will enhance digital telecommunication services to various areas where Internet access is not available. DOF: Resolution by which. At this year's Pacific Telecommunications Council conference, Zayo proudly announced a groundbreaking new expansion – a long-haul fiber route extending from a cross-border connection in El Paso, Texas to Queretaro, Mexico due to be completed by the end of 2025. The route marks both a Zayo first and.
