

Monitoring Intelligent Power Distribution Cabinet

Overview

Intelligent PDUs set themselves apart from traditional units. You can monitor and control power at individual outlets. These units enable remote management, multi-point metering, and environmental monitoring. This helps you identify conditions that place critical IT equipment at risk. Panduit's iPDUs provide comprehensive, accurate, energy measurement data to efficiently use power resources, make informed capacity planning decisions, improve uptime. The Soetec K series PDU is a remote-monitoring power distributor. The software is secure and reliable, supporting TCP/IP protocol stacks like HTTP, SSL, SNMP, TELNET, SSH, SMTP. Providing both a Multi-colour OLED illuminated display and IP monitoring of the total overall power, as well as individual outlet and cabinet environmental. Intelligent PDUs and Intelligent Power Management play an important role within the Data Centre / Enterprise IT environments. Discovering how much power IT equipment is consuming helps identify areas where energy savings can be made. Equipment that can be powered down or replaced with more energy. If you're looking for a monitored PDU solution, the Smart PDU from Server Technology offers input current monitoring on an easy-to-view LED, and remote monitoring via network or serial connection login.
