

NEMA4X High-Density Optical Cable Fault Locator Available Now

Article Overview

High-performance, portable optical cable fault locators are available from EXFO, FS, Megger, and VIAVI, offering visual fault detection, pinpointing, and rugged NEMA4X-rated designs for field use.

Visual Fault Locators (VFLs)

EXFO FLS-190 is a pocket-sized, high-power visual fault locator (VFL) designed for long-distance fiber testing. It emits a red laser that shines through jacketed fibers to identify breaks, bends, faulty connectors, splices, or other signal loss causes. With a 5 mW output, it can reach up to 12 km depending on fiber attenuation and ambient light. Its compact, anodized aluminum design ensures portability and durability, and it operates for up to 30 hours on standard AA batteries or rechargeable options, making it ideal for field technicians. FS VFLs offer a range of power options from 1 mW to 30 mW for locating faults, verifying continuity, and checking polarity. These devices are available for fast shipping and are suitable for high-density fiber networks.

Advanced Cable Fault Locating Systems

Megger portable cable fault locating systems provide all-in-one solutions for identifying, pre-locating, and pinpointing faults in underground power and optical cables. These systems are engineered for rugged environments, including harsh weather and remote locations. They feature automated test sequences, intuitive sof...
