

Norwegian Cable Ladder Tray Price Quote

Article Overview

Cable ladder trays in Norway typically range from \$2 to \$25 per meter, depending on material, type, and coating, with hot-dip galvanized steel being common for heavy-duty applications.

Pricing Overview

Cable ladder tray prices vary based on material, size, coating, and supplier. Common materials include galvanized steel, stainless steel, aluminum, and fiberglass composites, each affecting durability and cost. Ladder trays, designed for heavy cable loads, are generally more expensive than wire mesh or perforated trays. The average price per meter ranges from \$2 to \$25, with bulk orders or project-specific procurement potentially lowering costs. Standard lengths are often 2.4 meters, with fittings priced per unit.

Material and Coating Considerations

- Hot-dip galvanized steel (HDG): Highly durable, corrosion-resistant, ideal for coastal or offshore environments, commonly used in Norway.
- Stainless steel: Superior corrosion resistance, higher cost, suitable for harsh environments.
- Aluminum: Lightweight and rust-proof, moderately priced.
- Fiberglass (FRP/GRP): Non-conductive, corrosion-resistant, used in specialized projects. Coatings like powder coating or pre-galvanized finishes can further influence pricing and longevity
