

Parameters of Malaysian Fiber Optic Splice Box

Article Overview

Malaysian fiber optic splice boxes vary in size, capacity, coupling types, and environmental protection, with options for both indoor and outdoor applications.

Key Specifications

1. Capacity and Fiber Management

- Outdoor dome splice closures can handle up to 144 single fibers (24 fibers × 6 trays) and are rated IP68 for environmental protection, making them suitable for harsh outdoor conditions .
 - Compact indoor splice boxes, such as the FIMP-M, support a maximum splicing capacity of 12 fibers, suitable for smaller-scale installations or specific networking scenarios .
 - Some distribution boxes offer modular splicing trays or cartridges, allowing flexible fiber management and expansion .
- #### 2. Dimensions and Form Factor
- The FIMP-M splice box measures 115 × 61 × 113 mm, providing a compact solution for installations with limited space .
 - Other wall-mounted or panel-mounted distribution boxes vary in size depending on the number of ports and trays, with options ranging from 4-port to 48-port FTTH termination boxes .
- #### 3. Coupling Types and Fiber Compatibility
- Malaysian splice boxes support a variety of couplings including SMA, ST, SC, LC-Quattro, FC-PC, SC-RJ, and E2000, accommodating diverse network requirements .
 - They are compatible with both Multimode (50μ and 62.5μ) and Singlemode fibers,...
