

Price of Optical Cable Sheathing

Article Overview

The cost of optical cable sheathing typically ranges from \$0.05 to \$1.50 per meter, depending on material, type, and application.

Cost Overview

The price of fiber optic cable sheathing varies widely based on the material used, environmental protection, and cable specifications. For standard bulk purchases, the unit cost generally falls between \$0.05 and \$1.50 per meter, with wholesale prices sometimes ranging from \$0.30 to \$4 per meter depending on the fiber count, jacket type, and intended use. Retail prices for complete fiber optic cables, including sheathing, can range from \$1 to \$6 per foot, reflecting differences in fiber type, strand count, and protective features.

Sheath Material Types and Pricing Factors

- **PVC (Polyvinyl Chloride):** Cost-effective and versatile, commonly used for indoor LANs, data centers, and residential installations. Offers good moisture, chemical, and impact resistance but is less suitable for extreme temperatures or prolonged UV exposure.
- **TPE (Thermoplastic Elastomers):** Slightly higher cost than PVC due to superior flexibility and durability, ideal for dynamic or high-flex applications like robotics and industrial automation.
- **Metal Sheaths (Steel or Aluminum):** Provide mechanical strength and EMI shielding, typically used in industrial zones, underground installations, or military applications. These are more expensive due to material and manufacturing complexity
