

Price of Relay Protection Wall Display Board

Article Overview

Relay Protection Wall Display Boards typically range from \$150 to \$800 or more, depending on configuration, number of relays, and features.

Overview

Relay Protection Wall Display Boards are used to monitor and control electrical circuits, often in industrial or educational settings. They integrate multiple relays, display panels, and sometimes microcontroller-based logic to simulate or manage real-world electrical protection systems . These boards can include features like current loop displays, output relays, and configurable inputs for training or operational purposes .

Price Range

- Basic educational or small-scale boards: \$150-\$300. These typically include a few relays, LED indicators, and simple input/output terminals suitable for lab or classroom use .
- Advanced industrial or demonstration boards: \$400-\$800+. These may feature multiple relays, programmable logic, current loop displays, and wall-mounted configurations for professional training or industrial monitoring .
- Custom or bulk orders: Prices can vary significantly depending on specifications, number of relays, and additional features like microcontroller integration or solid-state components
