

Price of fusion spliced pigtails

Article Overview

Fusion spliced pigtails typically range from \$2 to \$15 per unit, depending on fiber type, length, and connector configuration.

Overview

Fusion spliced pigtails are short fiber optic cables with a connector on one end and a bare fiber on the other, designed for fusion splicing to a main fiber line. They are available in single-mode or multimode fibers, with common connector types including SC, LC, and ST . Mass fusion pigtails can include 12-fiber ribbons for simultaneous splicing, which can reduce installation time and labor costs .

Price Factors

- **Fiber Type:** Single-mode fibers generally cost more than multimode due to higher precision requirements and lower attenuation .
- **Length:** Standard pigtails are usually 1-2 meters, but custom lengths can increase the price .
- **Connector Type:** Premium connectors like LC or APC variants may add to the cost compared to standard SC connectors .
- **Mass Fusion vs Single Fiber:** Ribbonized mass fusion pigtails (12 fibers) are more expensive than single-fiber pigtails but save labor during installation .
- **Brand and Quality:** Premium brands like Corning, Leviton, and Belden offer factory-tested, low-loss pigtails, which are priced higher than economy options .
