

Recommended list of fiber optic cable faceplates

Article Overview

The best fiber optic faceplate depends on your installation needs, but high-impact polymer faceplates with SC or LC adapters, modular design, and flush or surface-mount options are generally recommended for durability, performance, and ease of use.

Key Considerations

1. Connector Type Compatibility Faceplates should match the fiber connectors used in your network. Common options include:

- SC (Standard Connector): Simplex or APC versions, widely used in residential FTTH deployments .
- LC (Lucent Connector): Duplex adapters, ideal for high-density applications like data centers .
- ST (Straight Tip): Less common today but still supported in some legacy systems .

2. Mounting Style

- Flush-Mounted: Installed within the wall for a clean, professional look; ideal for residential or office environments .
- Surface-Mounted: Attached externally to the wall; easier to install and suitable for retrofits or areas without standard wall boxes .

• 86-Type vs. Surface-Mount: 86-type fits standard wall boxes, while surface-mount boxes attach directly to the wall .

3. Material and Durability

- High-Impact Polymers (ABS, Polycarbonate): Lightweight, flame-retardant, and res...
