

The optical power meter is not charging

Overview

Recharge: Ensure the battery is fully charged before use. Use manufacturer-recommended batteries to ensure compatibility and performance. Below are general answers on how to operate, maintain, and calibrate an optical fiber ranger from the list of GAO Tek's optical power meters. Turn on the optical power meter (OPM) using the power button. You will learn:

- How an Optical Power Meter works
- OPM interface: insert the fiber to be tested, test the optical power.

REF/dB key: Short press the dB to switch unit, click once nW/dBm/dB to enter the upper clear data, press and hold until REF is displayed on the screen, and set the current optical power as reference value, enter the relative.

1. Operate the power meter only within the specified voltage range Do not apply voltage outside the specified range of the input connections Do not operate the power meter if there.
