

UAE sells 96-core optical fiber cable

Article Overview

96-core optical fiber cables are available in the UAE, offered in both armoured and unarmoured single-mode configurations for high-capacity network deployments.

Overview

The UAE market provides a variety of 96-core optical fiber cables suitable for large-scale telecom, enterprise, and data center networks. These cables are designed for high-speed, long-distance data transmission and are available in both single-mode (OS2) and multimode variants, depending on network requirements .

Key Features

- **Armoured Cables:** Armoured 96-core cables, such as Avalon OS2 models, feature corrugated steel tape armor and HDPE outer sheaths, offering protection against rodents, crushing, UV radiation, chemicals, and harsh weather. They are ideal for outdoor, direct burial, duct, or aerial installations .
- **Unarmoured Cables:** Unarmoured loose tube designs provide UV-stabilized, water-blocked protection for outdoor duct applications, suitable for indoor/outdoor LSZH installations .
- **High Capacity & Reliability:** Multi-tube, jelly-filled designs ensure low attenuation, moisture resistance, and stable optical performance, making them suitable for FTTH networks, backbone connectivity, and data centers .
- **Single-Mode vs Multimode:** Single-mode OS2 fibers are optimized for long-distance transmission, while multimode fibers (OM3, OM4, OM5) are used for shorter, high-speed connections
