

What is the Huawei firewall with added optical module

Article Overview

Huawei USG series firewalls, such as the USG6330-AC, support optical modules via 10GE optical ports, enabling high-speed fiber connectivity for enterprise networks.

Supported Models and Optical Interfaces

Huawei offers several firewall models that can integrate optical modules:

- USG6330-AC: Supports Huawei 2×10GE optical ports along with 8GE electric ports through an interface card, suitable for small- to medium-sized enterprise networks and branch locations (Huawei USG6330-AC Datasheet) .
- USG6700E Series: Designed for large enterprise campuses and data centers, these next-generation firewalls provide high-performance NGFW capabilities and can work with optical modules for high-speed uplinks and IPsec VPN acceleration (Huawei USG6700E Product Page) .
- USG6600F & USG6700F Series: AI-powered firewalls that support multiple built-in acceleration engines and can interwork with optical modules for enhanced throughput and encrypted traffic inspection (Huawei HiSecEngine Datasheet) .

Key Features with Optical Modules

- High-Speed Connectivity: Optical modules provide 10GE fiber connections, enabling fast and reliable data transmission between firewalls and core network switches.
- Flexible Deployment: Hot-swappable interface cards allow easy integration of opti...
